Professional Summary

Passionate MERN Stack Developer and Automation Engineer with hands-on experience in developing modern web applications and robust test automation frameworks. Skilled in React.js, Node.js, TypeScript, Playwright, and Cypress. Demonstrated ability to integrate AI models (LLMs) into tools, design scalable test architectures with Page Object Model (POM), configure CI/CD pipelines (GitHub Actions, Jenkins), and build full-stack applications. Strong problem-solving ability with a passion for learning new technologies.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Material UI, Vite

Backend: Node.js, Express.js, REST API

Database: MongoDB, Firebase, Supabase

Testing & Automation: Playwright, Cypress, Postman, AI-driven Testing

Tools & CI/CD: Git, GitHub, VS Code, GitHub Actions, Jenkins

Projects

PlayVision – AI-Powered Playwright Test Reporter

GitHub

- Developed an intelligent, high-performance Playwright reporter using a React-based SPA.
- Integrated local (Ollama) and cloud (OpenAI) LLMs to automatically analyze test failures and suggest actionable root cause fixes.
- Implemented advanced features like source traceability with VS Code deep links, and PDF/Excel report exports.

OrangeHRM Automation Framework

GitHub

- Built a scalable, industry-standard test automation framework using Playwright and TypeScript.
- Implemented the Page Object Model (POM), custom fixtures for Dependency Injection, and hybrid API testing via network interception.
- Configured robust event-driven CI/CD pipelines using GitHub Actions and Jenkins for automated multi-environment execution.

Playwright TypeScript Practice Suite

GitHub

- Created a comprehensive, hands-on learning suite demonstrating end-to-end testing best practices with Playwright.
- Developed modular utilities, multi-environment configurations (.env), and a scalable framework architecture to simulate industry-level test suites.

- Developed a Postman-like API testing application using React.js, TypeScript, and Material UI.
- Supported comprehensive HTTP methods (GET, POST, PUT, PATCH, DELETE) with various authentication schemes.
- Improved developer productivity by simplifying and streamlining API testing workflows directly from the browser.

Experience

MERN Stack Developer & Automation Engineer

- Developed responsive web applications using React.js and built scalable REST APIs using Node.js and Express.js.
- Integrated Firebase and Supabase services for seamless backend operations.
- Designed and executed UI and API automation testing using Playwright and Cypress, integrating AI for smarter reporting.
- Utilized Git, GitHub, Jenkins, and GitHub Actions for version control and continuous integration.

Education

Bachelor of Engineering (B.E.)

Computer Science Engineering

Anna University

Certifications

- MERN Stack Development
- Web Development
- Cypress Automation Testing
- Playwright Test Automation

Strengths

- Full Stack Web Development
- Test Automation (Playwright, Cypress)
- CI/CD & DevOps Practices
- AI Integration in Tooling
- Problem Solving & Continuous Learning
- Team Collaboration
